

Search Engine

Part 1

Big Data

Specific tasks for the stage 1

Crawler (python)

Indexer (python)

- Make sure you tests at least two different data structures for the inverted index to benchmark them
- Scalable data structures will be appreciated

Minimal query engine for testing purposes (python)

Delivery

A scientific paper detailing the developed solution.

Access to the repository for code evaluation.

A presentation defense to showcase the work completed on the agreed-upon date.
